REASONS FOR ALLOWANCE

1. Claims 21-23, 26-29, and 31-39 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 21, prior art does not disclose or fairly suggest an irradiation device including wherein all movable parts of a gantry are, in all situations, situated at a distance from a rotation axis larger than a predetermined value, an inner gantry part being rotatably supported by an outer gantry part at two support locations, situated on opposite sides of a treatment volume in a direction parallel to said axis, said outer gantry part being stationary with respect to said treatment volume, said radiation head being movable relative to said outer gantry along at least one arc of a circle substantially centered at said treatment volume, said arc being non-parallel with the rotation of a radiation head around said rotation axis, whereby non-coplanar irradiation treatment is achievable, in combination with all the limitations in the claim. Claims 22, 23, 26-28, and 31-39 are allowed by virtue of their dependency.

Regarding claim 29, prior art does not disclose or fairly suggest an irradiation device including wherein a radiation head is tiltably supported by a linear beam portion, said radiation head directing its radiation towards a treatment volume from any position relative to said linear beam portion, in combination with all the limitations in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
